

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) Tray for the transportation of products, formed by a sheet equipped with a series of folding lines that define:

- a bottom of the tray;
- a couple of headers;
- a couple of sides;
- a polygonal column on each ~~of its corners~~ corner of the tray; and
- two top flaps, each of which extends horizontally from one of the headers to ~~the~~ an inner area of the tray;

the tray also comprises inclined folding lines that allow ~~the~~ folding of the headers and the sides on the bottom of the tray; ~~wherein~~ said inclined folding lines are located on the headers and on said top flaps; wherein each column has an associated orifice on the top flaps for insertion of a reinforcement member in said columns.

2. (Currently amended) Tray according to claim 1, wherein each header and top flap comprises two inclined folding lines, that extend from ~~the~~ lower corners of the header substantially towards ~~the~~ a centre of ~~the~~ a top part of the ~~same~~ top flap.

3. (Currently amended) Tray according to claim 1, wherein each top flap comprises a couple of side flaps that are fixed to ~~the~~ an outer part of the sides.

4. (Currently amended) Tray according to claim 1, wherein each top flap comprises a couple of ~~additional~~ folding lines, that extend from ~~the~~ corners in contact with the headers to ~~the~~ an inner area of the tray, in ~~the assembly~~ an assembled position.

5. (Canceled)

6. (Currently amended) Tray according to claim 5 1, wherein each orifice comprises an articulated tongue, that is accommodated inside the column when inserting said reinforcement member.

7. (Currently amended) Tray according to claim 5 1, wherein said reinforcement member is a plaque shaped.

8. (Currently amended) Tray according to claim 1, wherein said columns are triangular, ~~the side that~~ and a side of said columns is defined by the hypotenuse of ~~said a~~ a triangle which comprises a vertical folding line.

9. (Currently amended) Tray according to claim 5 1, wherein said reinforcement member is a triangular prism formed by a laminar element.

10. (Previously presented) Tray according to claim 1, wherein said sides have a double thickness.
